

Supplemental Pain Management Program

The past decade has seen great advancements in pain management in Veterinary Medicine. We at Montevallo Animal Clinic would like to offer our surgery patients this benefit and provide post-operative pain relief. For any of our surgery patients we do recommend pain management. For cats this includes an injection, for dogs this includes an injection and four days of oral medication. For more involved procedures stronger drugs may be used. One of these drugs, the Fentanyl Patch gives three to four days of pain relief. With your permission it can be applied prior to your pet's routine surgery to provide enhanced pain control during the post operative period. **All pain medication is at an additional cost:**

CHOOSE ONLY ONE

Cats:

Pain Injection \$22.20

Dogs:

Pain Injection & Oral Medication 0-25 \$24.20
